Important Notice

CommerceExtensions reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to CommerceExtensions terms and conditions of sale supplied at the time of order acknowledgment.

CommerceExtensions warrants performance of its products to the specifications applicable at the time of sale in accordance with CommerceExtensions standard warranty. Testing and other quality control techniques are used to the extent CommerceExtensions deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

CommerceExtensions assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using CommerceExtensions components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

CommerceExtensions does not warrant or represent that any license, either express or implied, is granted under any CommerceExtensions patent right, copyright, mask work right, or other CommerceExtensions intellectual property rights relating to any combination, machine, or process in which CommerceExtensions products or services are used. Information published by CommerceExtensions regarding third-party products or services does not constitute a license from CommerceExtensions to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from CommerceExtensions under the patents or other intellectual property of CommerceExtensions.

Resale of CommerceExtensions products or services with statements different from or beyond the parameters stated by CommerceExtensions for that product or service voids all express and any implied warranties for the associated CommerceExtensions product or service and is an unfair and deceptive business practice. CommerceExtensions is not responsible or liable for any such statements.

All company and brand products and service names are trademarks or registered trademarks of their respective holders.

Extension Overview

This extension allows you to import and export your Magento CMS Pages in bulk via csv format. For example you could use this extension to transfer existing CMS Pages from either a older Magento 1 installation or a 3rd party data source and import them directly into your new Magento installation. It could also be used to update and maintain existing cms pages and can be very useful for medium to large sites that could have hundreds of cms pages. The ability to bulk edit this amount of data in a spreadsheet is the fastest way to manage the data and support all fields such as page title / meta description / if cms page is approved or not / url_key / date created / content_heading / cms content / layout type all cms options etc). See Screenshot or example csv import_bulk_cms_pages.csv for a more details.

All documentation for install and user instructions as well as sample csv's are included. Feel free to email me directly at scottbolasevich@gmail.com with any questions

Extension Features:

- Import/Export CMS pages and all related data

- Can Optionally Export CMS pages by Store ID

- Great for transferring CMS pages from an old magento site to a new site

Extension Installation

1. Log out from Magento Admin panel if you are logged in

2. Unpack the contents of the zip file purchased and VIA ftp and upload the app folder to your magento install root.

3. Log into Magento Admin Panel

4. If Cache Control is enabled in Magento go to 'System > Cache Management' section, select 'Refresh' under 'All Cache' drop-down menu and press 'Save Cache Settings'

5. Now go to System > Import / Export > Commerce Extensions -> CMS Pages Import/Export and you can use the profiles from here to import and export.

6. **OPTIONAL** – you can setup either import/export profiles as a cron job see this url ->

   http://www.commerceextensions.com/how_to_setup_cron_job

Extension Usage

1. **DO NOT** – Edit the CSV in excel it strips format and breaks import. I recommend using openoffice.org calc and saving in utf-8 format. Or use the (XML) versions for the profile and the excel workbooksheet 2003 XML format.

2. Overall the extension is very straight forward. You can find in magento admin under

   system -> import/export -> Commerce Extensions CMS Pages Import/Export

   import cms pages terms
   export cms pages terms

   and you can run the export to get a sample csv of products already in your site and then you just upload via ftp to var/import and run the import profile and it will import it back in.

3. NOTE THE following fields and value settings for them

created_at = the date the review was "added" can be blank for current date/time at import

page_title = this is the cms page title

url_key = this is the url for the cms page

storeview = these are the store codes (not the actual name) default,french,german,admin etc all values are comma delimited if only 1 value just put value

status = this is either Enabled or Disabled

content_heading = this is cms page content heading

content = actual cms page content

layout = type of layout can be one_column / two_columns etc

meta_keyword = cms page meta keywords

meta_description = cms page meta description

layout_update_xml = magento XML for layout

custom_theme = this can be default/default or default/custom etc depending on the themes you have in your install

custom_root_template = type of layout can be one_column / two_columns etc

custom_layout_update_xml = magento XML for layout

custom_theme_from = date format 10/11/2010

custom_theme_to = date format 10/11/2010are root catalog IDS)

Support

CommerceExtensions offers only PAID support and 6 months of free updates from date of purchase for all magento extensions.

If you need paid support related to CommerceExtensions extension usage, feel free to contact me at scottbolasevich@gmail.com
