

RESIDENTIAL COMMERCIAL  
INDICATOR FOR CUSTOMER ADDRESS

User Guide

## Important Notice

CommerceExtensions reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to CommerceExtensions terms and conditions of sale supplied at the time of order acknowledgment.

CommerceExtensions warrants performance of its products to the specifications applicable at the time of sale in accordance with CommerceExtensions standard warranty. Testing and other quality control techniques are used to the extent CommerceExtensions deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

CommerceExtensions assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using CommerceExtensions components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

CommerceExtensions does not warrant or represent that any license, either express or implied, is granted under any CommerceExtensions patent right, copyright, mask work right, or other CommerceExtensions intellectual property rights relating to any combination, machine, or process in which CommerceExtensions products or services are used. Information published by CommerceExtensions regarding third-party products or services does not constitute a license from CommerceExtensions to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from CommerceExtensions under the patents or other intellectual property of CommerceExtensions.

Resale of CommerceExtensions products or services with statements different from or beyond the parameters stated by CommerceExtensions for that product or service voids all express and any implied warranties for the associated CommerceExtensions product or service and is an unfair and deceptive business practice. CommerceExtensions is not responsible or liable for any such statements.

All company and brand products and service names are trademarks or registered trademarks of their respective holders.

## Extension Overview

This extension adds the ability for the customer or admin to flag addresses as business or residential. This extension can be used with other modules / themes extensions. It allows customer to choose residential or commercial for the address in both one page and multi address checkouts and works with Fedex/UPS shipping rates to give a different rate based on if the address is marked for residential or commercial.

### Features:

- allows customer to choose residential or commercial for the address in both one page and multi address checkouts
- allows admin to change address location in admin panel on customer record
- works for both billing and shipping addresses
- works on editing "my account" and related screens in customer management screens
- Works with both Fedex and UPS Shipping Rates.

## Extension Installation

1. Log out from Magento Admin panel if you are logged in
2. Unpack the contents of the zip file purchased and VIA ftp and upload the app folder to your magento install root.
3. SSH into your magento 2 server and clear cache using command

```
php -f bin/magento cache:flush
```

4. After uncompressing the residential commercial indicator package, you should have one folder: app

Upload everything in the app/\* folder to your app/\* folder.

5. SSH into your magento 2 server and run command via ssh in root of magento 2 install to install module

```
php -f bin/magento setup:upgrade
```

and

```
php -d memory_limit=1024M -f bin/magento setup:di:compile
```
