

IMPORT/EXPORT CUSTOMERS FOR MAGENTO 2

User Guide

Important Notice

CommerceExtensions reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to CommerceExtensions terms and conditions of sale supplied at the time of order acknowledgment.

CommerceExtensions warrants performance of its products to the specifications applicable at the time of sale in accordance with CommerceExtensions standard warranty. Testing and other quality control techniques are used to the extent CommerceExtensions deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

CommerceExtensions assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using CommerceExtensions components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

CommerceExtensions does not warrant or represent that any license, either express or implied, is granted under any CommerceExtensions patent right, copyright, mask work right, or other CommerceExtensions intellectual property rights relating to any combination, machine, or process in which CommerceExtensions products or services are used. Information published by CommerceExtensions regarding third-party products or services does not constitute a license from CommerceExtensions to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from CommerceExtensions under the patents or other intellectual property of CommerceExtensions.

Resale of CommerceExtensions products or services with statements different from or beyond the parameters stated by CommerceExtensions for that product or service voids all express and any implied warranties for the associated CommerceExtensions product or service and is an unfair and deceptive business practice. CommerceExtensions is not responsible or liable for any such statements.

Extension Overview

This Magento 2 extension allows you to import and export your magento customer data. This extension also supports import/export of all customer data such as (customer type / billing and shipping address / password / password hashes. You can set clear text passwords on import). This extension will import/export data in CSV format.

FEATURES:

- Import/Export all customer data / including custom customer attributes.
- Import/Exports all customer addresses including default billing / shipping addresses and all other addresses.
- Can optionally create Customer Groups at time of import if they do NOT exist
- Supports Multi-store environments
- Can set clear text passwords on import
- Optionally Convert Magento1 Hashes to Magento 2 Hashes
- Comes with a User Manual / Install Instructions

Extension Installation

1. Log out from Magento Admin panel if you are logged in
2. Unpack the contents of the zip file purchased and VIA ftp and upload the app folder to your magento install root.
3. SSH into your magento server and Clear cache using command

```
php -f bin/magento cache:flush
```
4. After uncompressing the customer import/export package, you should have one folder: app

Upload everything in the app/* folder to your app/* folder. Then go to app/etc/modules

5. SSH into your magento server and run command via ssh in root of magento install to install module

```
php -f bin/magento setup:upgrade
```

and

```
php -d memory_limit=1024M -f bin/magento setup:di:compile
```

Extension Usage

1. **DO NOT** – Edit the CSV in excel it strips format and breaks import. I recommend using openoffice.org calc and saving in utf-8 format.
2. Overall the extension is very straight forward. You can find in magento admin under

system -> import/export advanced customers

and you can run the export to get a sample csv of customer data already in your site and then you just upload via the browse button and click the import customers button and it will import it into the system.
3. You can control the option creating customer groups that do not exist on import by setting the "[Auto Create Customer Groups](#)" by changing the setting from "No" to "Yes"
4. You can control the option of forcing a customerID on import by changing the setting of "[Insert Customer ID](#)" from "No" to "Yes".
5. You can control the option of updating a existing customer password on import by changing the setting of "[Update Customer Password](#)" from "No" to "Yes".
6. You can control the option of optionally updating a existing customer firstname/lastname with the billing/shipping names. This is great for moving data from other systems and or older magento 1 systems where that data could be missing and is now required by magento2. You can change this by changing the setting of "[Replace Firstname/Lastname with billing/shipping names if empty](#)" from "No" to "Yes".
7. You can control the option of optionally converting magento 1 password hash format into magento 2 password hash format by changing the setting of "[Convert Magento 1 Hashes to Magento 2 Hashes Format](#)" from "No" to "Yes".

8. On export you can control the option of exporting all addresses for a customer by setting of "Export Multiple Addresses" from "No" to "Yes".
9. On export you can control the option of exporting the customer_id for a customer by setting of "Export Customer ID" from "No" to "Yes".

Support

CommerceExtensions offers only PAID support and 6 months of free updates from date of purchase for all magento extensions.

If you need paid support related to CommerceExtensions extension usage, feel free to contact me at scottbolasevich@gmail.com
