# IMPORT/EXPORT CMS STATIC BLOCKS

FOR MAGENTO 2

User Guide

Important Notice

CommerceExtensions reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to CommerceExtensions terms and conditions of sale supplied at the time of order acknowledgment.

CommerceExtensions warrants performance of its products to the specifications applicable at the time of sale in accordance with CommerceExtensions standard warranty. Testing and other quality control techniques are used to the extent CommerceExtensions deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

CommerceExtensions assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using CommerceExtensions components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

CommerceExtensions does not warrant or represent that any license, either express or implied, is granted under any CommerceExtensions patent right, copyright, mask work right, or other CommerceExtensions intellectual property rights relating to any combination, machine, or process in which CommerceExtensions products or services are used. Information published by CommerceExtensions regarding third-party products or services does not constitute a license from CommerceExtensions to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from CommerceExtensions under the patents or other intellectual property of CommerceExtensions.

Resale of CommerceExtensions products or services with statements different from or beyond the parameters stated by CommerceExtensions for that product or service voids all express and any implied warranties for the associated CommerceExtensions product or service and is an unfair and deceptive business practice. CommerceExtensions is not responsible or liable for any such statements.

All company and brand products and service names are trademarks or registered trademarks of their respective holders.

Extension Overview

This module allows you to import and export your cms static data such as title / if cms page is approved or not / url_key / date created / content etc). See Screenshot of example import_bulk_cms_static_pages.csv for a more details. This extension will import/export data in CSV format.

FEATURES:

- Import/Export CMS Static Blocks and all related data

- Great for transferring CMS Static Blocks from an old magento site to a new site

- Works great on all version of community edition as well as professional and all versions of Enterprise Edition.

Extension Installation

1. Log out from Magento Admin panel if you are logged in

2. Unpack the contents of the zip file purchased and VIA ftp and upload the app folder to your magento install root.

3. SSH into your magento server and Clear cache using command

   php -f bin/magento cache:flush --all

4. After uncompressing the cms static blocks import/export package, you should have one folder: app

   Upload everything in the app/* folder to your app/* folder.

5. SSH into your magento server and run command via ssh in root of magento install to install module

   php -f bin/magento setup:upgrade

   and

   php -d memory_limit=1024M -f bin/magento setup:di:compile

Extension Usage

1. **DO NOT** – Edit the CSV in excel it strips format and breaks import. I recommend using openoffice.org calc and saving in utf-8 format.

2. Overall the extension is very straight forward. You can find in magento admin under

   system -> import/export CMS Static Blocks

   and you can run the export to get a sample csv of cms static blocks already in your site and then you just upload via the browse button and click the import static blocks button and it will import it into the system.

3. NOTE THE following fields and value settings for them

   created_at = the date the review was "added" can be blank for current date/time at import

   title = this is the page title of the static block

   url_key = this is the url for the cms static block

   storeview = this is store_id(s) for the cms static block

   content = actual cms static block content

   status = this is either Enabled or Disabled

Support

CommerceExtensions offers 1 hr of email support and updates for 6 months for all extension developed for Magento 2.

If you need support related to CommerceExtensions extension usage, feel free to contact me at scottbolasevich@gmail.com
